Page 2 / 2

The following standardized processes were carried out:

- Input inspection with visual inspection for mechanical damage as well as input function test
- Reproduction of the fault indication, as far as information from the customer is available
- Disassembly servo amplifiers/power supply module
- Cleaning of all parts
- Replacement of defective parts and incorporation of possible further product developments
- Assembly of servo amplifiers/power supply module
- Safety and function test with endurance test according to specification

In the course of repair and maintenance, the software version is installed in accordance with the version delivered to the service workshop, including the latest available service pack (SP). If no software version can be read out, the software version with the service pack (SP) will be installed according to the parts list of the product valid for the repair. Unless otherwise requested by the customer.

Incoming goods: 02.05.2024
Completion of repair procedure: 29.05.2024

Yours sincerely

Bosch Rexroth AG
